

European Facial

This 60-minute treatment focuses on your skin's needs. It can address your dry, dehydrated skin or help with skin that needs a calming treatment. Your skin will feel clean, refreshed and rejuvenated! It starts with a deep cleansing, followed by an exfoliation with steam, extractions, facial and décolleté massage, a mask specific for your skin, and finished with moisturizer, specialty products and sunscreen.

Tuscany Signature Facial

This 90-minute facial is like no other! This treatment utilizes unique protein enzymes that stimulate cell metabolism to dramatically improve the skin's appearance. It lifts, tightens, and firms facial skin, increasing textural clarity and tone. This facial starts with a deep cleansing, followed by an exfoliation with steam, extractions, and then an enzyme "hot peel" is applied. Once it neutralizes itself in 90 seconds, 2 tightening masks are layered. Once removed, moisturizer, specialty products and sunscreen are applied.

Executive Facial

This 40-minute treatment is a shorter version of our European facial. This facial starts with a deep cleansing, exfoliation with steam, facial and décolleté massage, a mask specific for your skin and finished with moisturizer, specialty products and sunscreen.

Express Facial

This 30-minute treatment will give you a taste of our Facial treatments. This facial starts with a deep cleansing and exfoliation with steam, followed by a mask specific for your skin and a light massage while your mask is on, and finished with a moisturizer and sunscreen.

Teen Facial

This 60-minute facial addresses the main concerns for clients dealing with acne; inflammation, bacteria control, exfoliation, and modulating oil production. Epicuren acne treatments utilize a unique combination of exfoliating enzymes, sulfur, and probiotics as an alternative to traditional methods, resulting in a noticeably clearer complexion. This facial will start with a deep cleansing, exfoliation with steam, extractions, light massage, not to spread bacteria, followed by a mask, spot treatment and specialty products, moisturizer and sunscreen.

Back Facial

This 40-minute treatment is everything you love about a "facial" for your back! It starts with a deep cleansing, followed by an exfoliation, extractions if needed, light massage, a mask and finished with specialty products, and moisturizer. It is purifying, calming and moisturizing.

Glycolic Peel

Epicuren's Glycolic Facial is great for addressing fine lines, acne, hyperpigmentation, and dry skin! It exfoliates lifeless cells and allows emerging new skin to absorb more oxygen and nutrients; critical elements to healthy, vibrant skin. This treatment can be added to our European, Executive or Express facial or as a treatment on its own.

Collagen Eye Treatment

This treatment is an add-on service to any of our facials. This Pro Collagen Serum contains ingredients that play a critical role of selectively stimulating Collagen production in human skin. It will help diminish the appearance of fine lines and wrinkles, results greater over time.

Exfoliation and Skin Polish

This treatment is an add-on service to any of our facials. This microcrystal scrub is an excellent and effective alternative to the traditional microdermabrasion machine. It is specifically designed to treat problem areas such as fine lines, wrinkles, congestion, pigmentation variations and small scars.
